SKILLS

- **Python** - Data Analysis, Web Scraping, Visualization, Machine Learning
- **AI & LLMs** - Prompt engineering, AI assistants, RAG, agents, API integration
- **SQL** - PostgreSQL, SQL Server CTEs, window functions
- **Power Bi** - DAX, KPI dashboards
- **C / C++ / C#** - OOP principles, Course score - 100
- **GIT** - version control, branching and merging

LANGUAGES

- Hebrew (Native)
- English (Advanced)
- Spanish (Conversational)

Amit Filler

DATA SCIENCE STUDENT

PROFILE

Data Analyst at Elad Systems, currently contributing to high-impact military AI initiatives in strategic collaboration with Hatal (IDF) and Elbit Systems.

Third year Data Science student with strong analytical and fast learning abilities, passionate about AI and data. I actively use AI tools and models in my studies, projects, and daily work, from data analysis and automation to building end to end solutions. Looking for a role in data science / analytics / Ai where I can turn data into insights and products, contribute value to the team, and continue developing practical skills in AI and data.

EDUCATION & PROJECTS

2023 - 2026

B.Sc Data Science The College of Management

- Completed first & second year with honors, **GPA - 88**
- Worked on multiple data and AI projects including flight price prediction using Python and web scraping, a financial stocks project with forecasting, clustering, and anomaly detection, and an advanced analytics project using Tableau. Gained hands on experience in EDA, modeling, dashboards, and end to end data workflows.

2025

Data & AI Analyst Program - CyberPro Israel

- **5 month** Data & AI Analyst course as part of the Lohamim LeHiTech program, combining theory and hands on labs in Python, SQL, Power BI, Excel and statistics.
- Built end to end analytics solutions using Python and SQL for data cleaning, ETL and analysis, and Power BI for modeling, dashboards and Analytics & AI features (AI assistants, RAG, agents, model concepts and APIs).
- Developed a capital markets project using an AI API and a financial dataset that answers natural language questions with clear, data driven insights.

WORK EXPERIENCE

2025- present

Data Analyst | Elad Software Systems

- Conducting data analysis for the IDF's 'Combat AI' project as an external consultant from Elad Systems, in collaboration with Elbit. Expertise includes managing large-scale data workflows, developing operational Qlik dashboards, and executing sophisticated SQL queries to optimize technological-military performance.

2024 - present

Security Officer at EdgeConnex

- Monitored systems and access points at Nvidia's server farm, collaborating with NOC to enforce security protocols.

2022 - 2023

Security Officer at IAI (Israel Aerospace Industries)

- Maintained facility security, ensured employee safety, and enforced information security protocols.
- Graduate "Malamab Achid 712" course by the Ministry of Defense.

2019 - 2021

Combat Soldier and Commander in Iron Dome, Air - Force

- Led and commanded numerous soldiers.
- Skilled in operating under challenging and changing field conditions.
- Completed 350 days of reserve duty as a Command Center Operator, performing operational shifts in the battery's command center (2023-2025).
